

Vijaya kumar Dadi

Visakhapatnam , India · +91 6300196114 · vijay.dadi123@gmail.com · <https://www.linkedin.com/in/vijayakumardadi>

Product Manager with 4+ years in product, plus 5 years in clinical/regulatory and market research across pharma and digital health, specializing in 0→1 development of ML-driven healthcare products. Built products from 0→1, lifting engagement +19% and adherence +10% while cutting missed follow-ups 12%. Grounded every decision in 90+ customer interviews and a model validated on 2,700+ patient recordings. Fluent in prompt engineering, model evaluation, and cost-latency-quality tradeoffs for non-deterministic systems, and able to prototype and ship independently with Claude Code and modern AI tooling.

Experience

Krakel Healthcare — Co-founder & Product Manager

Visakhapatnam · Apr 2022 – Nov 2025

0→1 clinical AI product for early respiratory disease screening

- Built a **0→1** product from concept to live hospital pilot, used by pulmonologists and frontline health workers.
- Owned the problem space **end-to-end under high ambiguity**: ran 50+ clinician interviews to translate fragmented clinical workflows into a usable mobile product.
- Drove **prioritization and trade-offs** across clinical usability, model performance, and deployment speed to scope and ship the MVP.
- Owned the full ML product lifecycle (data → labeling → validation), defining sensitivity/specificity thresholds and validating on 2,700+ patient recordings.
- Designed structured mobile data-capture workflows that improved adoption and data reliability in high-pressure hospital settings.

Numen Health — Product Manager, Patient Engagement & Care Delivery

Bangalore · Apr 2021 – Mar 2022

Chronic disease management — engagement, adherence & retention

- Owned **engagement and retention** for a chronic-care mobile platform; identified key journey drop-offs through 40+ user interviews/year.
- Defined core product metrics (engagement, adherence, follow-up continuity) and owned roadmap execution against them.
- Launched proactive patient engagement workflows reminders & follow-up nudges, that lifted engagement +19% and adherence +10%.
- Cut **missed follow-ups 12%**, improving long-term continuity of care.
- Owned the end-to-end product experience for both patients (mobile app) and care teams (internal dashboards), cutting response times and speeding up interventions.

Accenture (Client: Bristol-Myers Squibb) — Scientific Writer, Lead

Chennai · Nov 2013 – Feb 2017

- Led client-facing **delivery** for Bristol-Myers Squibb, managing cross-functional teams to produce **FDA-compliant clinical documentation** (patient narratives, safety summaries, CSRs) within strict regulatory timelines
- Translated complex **clinical trial data** into clear, structured regulatory submissions, ensuring data **accuracy and compliance**
- Built strong stakeholder relationships across medical, regulatory, and operations teams, ensuring alignment and timely delivery
- Developed deep understanding of clinical research processes, regulatory standards, and data integrity requirements

Cognizant Analyst – Market Research

Hyderabad · May 2011 – Nov 2013

- Conducted **market and competitive analysis** for global pharma clients, identifying trends and strategic opportunities
- Supported **enhancements to internal research platforms**, improving data accessibility and usability

Projects

- **Lung Sound Research & Data-Collection Platform**: Designed and led an Android research app integrated with a digital stethoscope for **real-time lung-sound capture and annotation**. Piloted at KIMS Bhubaneswar, adopted by pulmonologists; > **2,700+** patient samples collected for ML training.
- **PA Triage Queue (Confidence Score)**: Designed a 0–100 confidence-scoring system for ML-generated prior-authorization submissions with a color-coded **triage queue** and **explainability**; enabled **1-click bulk approvals** and a model-improvement feedback loop, focusing human effort on high-risk cases.

• **Clinical Lung Sound Learning Platform:** Conceived and designed a web learning app helping students and nurses train lung auscultation for disease screening. **Stack:** Claude Code, Vercel, Supabase, Google Stitch.

Skills

Product: 0-to-1 Development, Product Strategy, Roadmapping, Prioritization Frameworks, PRD/BRD, User Research, Stakeholder Management, GTM, Experiment Design & A/B Testing, Success Metrics Definition, Cross-Functional Leadership

AI: LLM Evaluation Systems, Prompt Engineering, Model Selection Tradeoffs, Non-Deterministic System Design

Data: Funnel & Cohort Analysis, Data-Driven Decision Making, Mixpanel

Prototyping & Tools: Claude Code, Lovable, Figma, Whimsical, JIRA, Notion

Education

MBA: Indian Institute of Management Calcutta (IIM C) · 2017–2018

AI Product Management Certification: Rethink Systems · 2026

M.Pharm: Vinayaka Missions University · 2009–2011

B.Pharm: Nagarjuna University · 2005–2009

Recognition

BIRAC & NIDHI Prayas Grant — Awarded **50K USD**

MedTech Innovator APAC (Olympus) — Finalist

UK–India HealthTech Accelerator — Selected
